Stonehill & Taylor's social booth is designed to be a hub of activity and creativity at this year's BDwest. The bar has a soft cool palette with warm wood and clean lines, creating a modern neutral base in which to build off of. Graphic artwork and structured geometric millwork add a layer of depth and draws the eye around the bar. Inspired by the 'lacy' homes in Siberia, Stonehill & Taylor created sheer lacy walls that filter dappled light into the space, adding another dimension to the space.
